

DIAVLON[®]

BLOCK FLUO-NP

Active: Bromdiolone 25pp & Difenacoum 25ppm
Colour: Red + Fluo
Size: 5kg - 25g Block
SKU: 1101004016

Diavlon Wax block is a unique bi-component extruded bait with second generation anticoagulants Bromadiolone & Difenacoum, has all the features of the standard extruded wax block formulation with added benefit of Fluo-NP[®] UV tracking technology.

Fluo NP[®] UV tracking technology utilises special dyes that are contained within the bait, that once ingested, help fluoresce & highlight rodent droppings with the use of an ultraviolet torch. Helping identify and locate rodent harbourages and movements, aiding in a more efficient baiting programme and assisting in the survey of proofing points.

Benefits and features:

- Suitable for mice and rats
- For use in and around Buildings.
- Fluo-NP[®] UV tracking technology
- Can aid against certain anticoagulant resistant mice and rats.
- High stability in wet and humid areas
- Multi edged extruded design exploits natural gnawing behaviour of rodents
- 25g Extruded block allows for easy application and prevents wastage
