

DIGRAIN FORCE EW

Professional oil-in-water Insecticide for Fast, Reliable Control

- POWERFUL KNOCKDOWN
- BROADSPECTRUM CONTROL
- OIL-IN-WATER FORMULATION
- PROFESSIONAL PERFORMANCE

High-strength Insecticide for Flying & Crawling Insects

Digrain Force EW is a high-performance oil-in-water emulsion formulated with a potent combination of cypermethrin (14.5%), tetramethrin (4.5%) and piperonyl butoxide (19.3%) for strong knockdown and residual performance. Ideal for treating domestic and commercial premises, Force EW delivers quick results against a wide range of insects including fleas, bed bugs, cockroaches and flying insects such as moths, flies, wasps, beetles and mosquitoes.

Key Benefits

High knockdown power

Tetramethrin delivers rapid knockdown, helping professionals deal with active infestations fast.

Strong, long-lasting residual control

Cypermethrin provides ongoing activity on treated surfaces, reducing reinfestation and return visits.

Oil-in-water emulsion for improved coverage

EW formulation spreads evenly over surfaces, enhancing penetration into porous areas for more effective treatments.

Versatile application for multiple pests

Suitable for both surface spray treatments and targeted spot applications, covering fleas, bed bugs, ants, cockroaches and flying insects.

Areas of use

It is effective in domestic, commercial, and industrial premises, including hospitals and military establishments.

Active Ingredients:

Cypermethrin 14.5% w/w

Tetramethrin 4.5% w/w

Piperonyl Butoxide 19.3% w/w

FOR PROFESSIONAL USE ONLY

For specific applications, it is recommended to dilute the product and apply it as a coarse surface spray, treating approximately 20 square meters per liter of solution.
