

QUARTZ AZ

Professional Killing Powder For
Tough Insect Infestations

Fast Knockdown | Multi-Pest Control
Direct Application | Professional Performance

Quartz AZ is a professional-grade 0.5% Azamethiphos dusting powder formulated for fast, targeted control of wasp and hornet nests, bed bugs, fleas, ants and cockroaches. Designed for direct application into cracks, crevices,

harbourages and nest entrances, it delivers rapid knockdown and dependable results in and around buildings, including residential, commercial, industrial and transport environments.

Key Features, Advantages & Benefits:

Fast-acting Azamethiphos formulation delivers rapid knockdown, providing quick control of active infestations with visible results within hours.

Multi-pest control capability effectively targets wasps, hornets, bed bugs, fleas, ants and cockroaches, allowing one product to be used across multiple infestation types.

Targeted dusting application penetrates deep into cracks, crevices, voids and nests, improving treatment accuracy and overall efficacy.

Ideal for nest and harbourage treatment, enabling direct application to insect activity points for enhanced control of hidden pests.

Versatile indoor and outdoor use, approved for application in and around buildings including homes, commercial premises, hospitals, vehicles and aircraft.

Professional-grade performance delivers reliable results on difficult infestations, making it a trusted solution for professional pest controllers.
